

NEW: automatic slack adjuster (AGS) gigant

Conversion brake 3020 / 3515 / 3620 / 4218 / 4220

The established gigant drum brakes will be equipped in future with the new gigant slack adjuster.

Fitting and attachment as well as the well-known fixed point bracket have been developed further.

Advantages:

- low maintenance
- easy and fast assembly
- optimum seal against dirt and water
- lever arm covering a variety of fitting situations
- constant brake performance over the entire brake lining lifetime

brake size	test report according to ECE R13	test report slack adjuster
3020	361-008-07	361-007-12
	361-036-08	
	361-006-12	361-008-12
3515	361-015-08	361-080-12
3620	361-014-08	361-087-12
4218	361-015-07	361-117-12
4220	361-031-07	361-116-12

Table 1: test reports slack adjuster

Important information

Please note that the vehicle specific approval must be updated. Table 1 shows an overview of different test reports for the several brake dimensions.

The corresponding documents can to be found at:

<http://gigant-group.com/en/service/overview-of-test-reports.html>

or may be requested at homologation@gigant-group.com.

Conversion to slack adjuster from gigant must always be done in pairs. The assembly of different AGS on an axle is not permitted.

Series production will be changed at **1st June 2015**.
