

New drum brake lining GIGANT 150 for wheel brake 4218

Series launch 10/2023

General aspects:

In collaboration with our friction lining supplier, GIGANT developed and validated the material GIGANT 150. The lining was tested according to ECE R13 as well as according to various in-house testing criteria.

Properties of the new brake lining 150:

- Tested according to ECE R13
- Stable friction coefficient behaviour throughout the entire lining service life
- Optimised wear behaviour in terms of temperature, pressure and speed

Note:

- Please note that within the scope of initial fitting, the new brake linings require updating of the vehicle-specific registration.
- Test protocol 361-015-07 suffix02 can now be downloaded from the GIGANT homepage: <https://www.gigant.com/service/pruefprotokolle/> or requested via homologation@gigant.com.

The GIGANT team is happy to answer any questions you may have and wishes you a safe journey.
