

Condition on delivery gigant – air suspension pre-assembled

Gigant deliver pre-assembled air suspensions (spring with hanger bracket) or with assembled gigant – axle and clamping attachment. Concerning the great number of assembling possibilities and versions the hanger bracket are not adjusted in riding height und the spring bolt connection is not tightened to the final tightening torque.

Note

- Further attached parts like shock absorber, air bellow and so on will be delivered separate packaged
- Spring bolt connections and shock absorber connections are critical screwing's
- The factory - adjusted spring bolt and shock absorber screwing have to be released and tightened to the given tightening torques.
- The wished riding height is to adjust according the riding height area of the set draing or suspension drawing.
- Indication sticker do the assembling simpler.
- For axle and suspension assembling are to observe the assembling guidelines.
