

gigant EuroAchse with disc brake 19,5" – Haldex DBT19LT

Start of production from 06´2016

The approved gigant EuroAchse (DOKH2 09010 4345H1) will be extended by the at the moment lightest brake caliper Haldex DBT 19LT for the standard program.

The product description: DOKH2 09010 3745H1.

From this combination arise as a result:

- Use of the 9t standard area optimised brake Haldex DBT19LT.
 - Changing brake linings without special tools.
 - Wear sensing identical to Haldex DBT22LT
 - Usage of the same components inside the brake caliper 19,5" and 22,5". Therefore same spare parts and tooling (tool kit DBT19LT/DBT22LT – gigant order number 703011016).
- Brake caliper fixing (H1) to the axle body like EuroAxle 22,5".
- Furthermore simple changing of the disc brake, without disassemble/assembling of the step-hub unit. Due to this feature no bearing adjustment necessary.

Technical data:

Axle load	max. 9t
Test load	10,2t
Basic number test report according ECE R13	361-087-15
Wheel connecting	Offset 120 / pitch circle Ø 335 / centre bore Ø 280,8
Possible tyres	Standard: 385/65R22,5 / Mega: 445/45R19,5"
Area of application	Semi-trailer, tandem trailer and drawbar trailer

The test report could be downloaded from gigant website: www.gigant-group.com/de/service/pruefprotokolle.html or requested by mail at homologation@gigant-group.com from now.
