

## New drum brake lining gigant 146 for wheel brake 3010

Start of production 10´2016

### General:

In cooperation with our long-term supplier of friction linings we have developed and validated the gigant brake lining 146. This brake lining has been checked according to ECE R13 for OEM and ECE R90 for OES.

### Features of the new brake lining gigant 146:

- Checked according ECE R13 and ECE R90
- Stabil friction coefficient behaviour of the brake lining for the complete lifetime.
- Optimised wear behaviour based on temperature, pressure and speed.
- Environmental at the actual level (according ECO-5 level).

### Notice:

Please take care, that due to the new brake lining for the original equipment, an update of the vehicle specified accreditation is necessary.

The **test report 361-028-07 Suffix01** could be downloaded from gigant website: [www.gigant-group.com/de/service/pruefprotokolle.html](http://www.gigant-group.com/de/service/pruefprotokolle.html) or requested by mail at [homologation@gigant-group.com](mailto:homologation@gigant-group.com) from now.
