However, the operator will clarify this in their respective data protection declaration.

Data processing by GIGANT

The data you entered on our social media pages, such as B. comments, videos, pictures, likes, public messages etc. are published by the social media platform and are never used or processed by us for other purposes. We only reserve the right to delete content if this should be necessary. We may share your content on our site if this is a function of the social media platform and communicate via social media platform with you. The legal basis is Art. 6 para. 1 sentence 1 lit. f GDPR.

Data processing takes place in the interest of our public relations and communication.

If you would like to object to a particular data processing on which we have an influence, please use the contact details given in the imprint. We will then check your objection or forward it to the social media platform if necessary.

If you send us an inquiry on the social media platform, depending on the required answer, we may also refer to other secure communication channels that guarantee confidentiality. You always have the option of sending us confidential inquiries to the address given in the imprint.

As already mentioned, we pay attention to the points where the provider of the social media platform gives us the opportunity to make our social media pages as compliant with data protection as possible. In particular, we therefore do not use the demographic, interest-based, behavior-based or location-based target group definitions for advertising that the operator of the social media platform may provide. With regard to statistics provided by the provider of the social media platform, we can only influence them to a limited extent and also cannot switch them off. However, we make sure that we do not use any additional optional statistics provided by the social media platform provider.

Data processing by the operator of the social media platform

The operator of the social media platform uses web tracking methods. Web tracking can take place regardless of whether you are logged in or registered on the social media platform. As already mentioned, we can hardly influence the web tracking methods of the social media platform. We cannot switch them off.

Please be aware of the fact that it cannot be excluded that the provider of the social media platform may use your profile and behavioural data, for example to evaluate your habits, personal relationships, preferences, etc.
